

## Keg Information

### General:

- Key Keg 20L Slimline
- Diameter - 9.5 "
- Height - 22.5" without a coupler. Add another 6-8" for coupler and line
- Weight - approx 50 #
- Capacity - 5.35 gallons, 20.2 liter, 683.5 oz

### Set up and Troubleshooting:

- Pressure to Key Keg must be regulated independently of other kegs
- Set pressure at 45 psi to start (50 psi max)
- We recommend a flow control faucet (account must purchase) to keep bubbles in solution: Perlick 650SS Flow Control Faucet - approx \$50
- Add additional 20' or more of line for short run systems
- Remove the plastic cap cover!!!
- Connect coupler to keg
